# The finest cooker hoods in the world

-elica

Manufactured in Italy for over thirty years, Elica Cooker Hoods adorn millions of kitchens across the globe. Beautiful, distinctive and stylish, they are more than just cooker hoods, they are a feast for the eyes and the senses...

### Elica Collection

The Elica Collection represents the pinnacle of the entire Elica range. These unique cooker hoods, including models created by David Lewis, the renowned international designer, are universally acclaimed for their matchless design and innovative technology.

Both aesthetically and in terms of quiet performance, this prestigious collection creates a stunning focal point for contemporary kitchen design - truly a breath of fresh air in form and function.

The Collection includes wall mounted, island and built-in hoods.

Please ask for our Elica Collection brochure.

## Elica Concept

Elica Concept products define themselves by their extraordinary elegance and effortless efficiency. They cleverly combine an inspired choice of materials with an unparalleled dedication to design detail. The result is that their innovative solutions transform any kitchen they grace.

### **Traditional Models**

Contemporary styling in stainless steel, aluminium or glass won't fit all kitchens. That's why we also have traditional integrated cooker hoods, built-in cooker hoods as well as models specially designed for use with range cookers - in all colours!

### Choosing a Cooker Hood

One of the key things to consider is style and look. But to ensure your choice gives optimum performance it should be at least as wide as your oven or hob.

Will your choice be ducted to the outside of the house? If so, the ducting needs to be the right size; a cooker hood installed with the correct ducting will extract virtually all the steam, cooking odours and airborne grease from the kitchen. If however, it's impractical to install ducting in your home, then charcoal filters can be used to re-circulate fresher air around the room.

Whichever method chosen, Elica adopt only the latest European standards when measuring the efficiency of their products. That's why Elica cooker hoods are recognised around the world for their unsurpassed performance.

# Advanced Cooker Hood Technology

## Automatic Sensor Technology

AST.

Imagine a cooker hood that can react automatically to conditions within the kitchen. AST, an innovation developed by Elica, enables the hood to do just that! Three individual sensors, which measure heat, ambient temperature, humidity and can switch the hood on and off accordingly, as well as adjust and control the extraction power. It can do all this for any type of hob: gas, electric or induction.

Among the many benefits of the AST system are: improved ventilation, better air quality, optimised noise levels as well as reduced energy consumption. Naturally, you can manually override the AST system at any time.

See our Elica Collection brochure for models featuring AST.

# Perimeter Aspiration

By use of an alternative extraction method, airflow can be directed to the outer edges of the cooker hood. In this way, the entire external perimeter of the hood is utilised, thus reducing energy consumption and also noise.

See our Elica Collection brochure for models featuring Perimeter Aspiration.

# Advanced Cooker Hood Technology

## Meteo

# Metex-

Meteo is the name we give to our advanced electronic control and communication system. Meteo's digital display constantly updates you with information about the current status of the cooker hood - extraction speeds, conditions of filters etc.

But that is only part of the story. Add to this a handy digital clock, an indispensable kitchen timer with alarm, an external sensor for providing information, including temperature, pressure as well as a weather forecast and you get an idea of just how versatile Meteo can be.

See our Elica Collection brochure for models featuring Meteo.

## External motors

Many models now offer the benefit of external motors. Here, the motor unit is located outside the hood - either in a loft space or on an outside wall - so achieving far superior performance and noise reduction.

## Remote Control

For even greater convenience, some models allow you to operate the cooker hood by remote control. Both the lighting and extraction can be controlled from our unique radio controlled handset.

See our *Elica Collection* brochure for models featuring Remote Control.

Our stainless steel corner chimney hood presents a stunning solution for the designer requiring a corner cooker hood.

### HYDRA CORNER

- 3 speed push button controls
- 4 x 20w halogen lamps
- Metal washable grease filters
- 150mm (6in) diameter ducting connector
- 100 x 100cm
- Airflow to 750 m<sup>3</sup>/h

### COVE st

Designed for professional style range cookers.

- Includes built in super twin 60
- 3 speed slider controls
- 2 x 40w hob lamps
- Metal washable grease filters
- 125mm (5in) ducting connector
- 60, 90, 100, 110 or 120cm wide

()

- Airflow to 480 m<sup>3</sup>/h
- Available with our high performance (1200 m<sup>3</sup>/h) built in remote 60
- Stainless steel, black, white, blue, green, maroon, cream

### CLASSIC

Stylish and powerful canopy hood in the style and colours to enhance range cookers.

 $\bigcirc$ 

- Includes built in super twin 80
- 3 speed slider controls
- 2 x 40w hob lamps
- Metal washable grease filters
- 125mm (5") ducting connector
- 90, 100, 110, 120 cm wide
- Airflow to 480 m<sup>3</sup>/h
- Available with built in ultra or our high performance (1200 m<sup>3</sup>/h) built in remote 80
- A taylor made chimney flue can be ordered as an optional extra
- Stainless steel, black, white, blue, green, maroon, cream

Designed to enhance range cookers and hobs – for the serious cook!

### PRO-ANGLO

- 3 speed slider controls
- Hob lamps
- Metal washable grease filters
- Available 90, 100, 120 or 150cm wide
- Airflow to 960 m<sup>3</sup>/h (120/150cm models only)
- Airflow to 480 m<sup>3</sup>/h (90/100cm models only)
- Stainless steel with black etched aluminium panel.
- Available with remote motors (1200 m<sup>3</sup>/h) for higher performances
- Colours to special order: black, white, blue green, maroon or cream

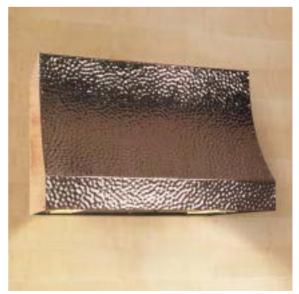

Copper and brass hand made canopies are finished with a clear hard lacquer to protect the natural material.

 $\bigcirc$ 

COPPER & BRASS CANOPIES

- Includes built in 52
- 3 speed slider controls
- 2 x 40w hob lamps
- Disposable grease filter
- 100mm (4") ducting connector
- 60 or 90cm wide
- Rippled copper, hammered copper, copper rose or antique brass rose
- Airflow to 270 m<sup>3</sup>/h
- Available with built in super twin & built in remote

### BUILT IN REMOTE 60 & 80

Offers a wider choice of powerful ventilation and less noise in the kitchen.

- Stainless steel encased external motor
- Variable slider control
- 2 x 20w halogen lamps
- Washable metal grease filters
- 150mm (6in) diameter ducting connector
- 52 or 72cm wide
- Remote motor casing 450mm wide, 480mm high, 170mm deep
- Ducting version only
- Airflow to 1200 m<sup>3</sup>/h
- Grey

BUILT IN ULTRA 80 | Our Ultra High Spec. built-in hood has twin tangential fans for high performance and halogen lights to illuminate the cooking area.

- 2 x 20w halogen lamps
- Washable metal grease filters
- 150mm (6in) diameter ducting connector
- 72cm wide
- Airflow to 700 m<sup>3</sup>/h
- Black or Grey

Our Deluxe built-in hood can be remotely controlled by means of the de-mountable switch unit and 3 metre cable, allowing the controls to be placed in a worktop or plinth for easy access and use.

- Twin Motor
- Variable slider control
- 14w fluorescent lamp
- · Washable metal grease filter
- 125mm (5in) diameter ducting connector
- 55cm wide
- Stainless steel
- Airflow to 480 m<sup>3</sup>/h

For fitting into larger canopies and featuring twin motors for high performance.

BUILT IN SUPER TWIN 60 & 80

- Twin motor
- 3 speed slider controls
- 2 x 40w hob lamps
- Washable metal grease filters
- 125mm (5in) diameter ducting connector
- 52 or 72cm wide
- Airflow to 480 m<sup>3</sup>/h
- Black, white or grey (52cm) black or white (72cm)

## BUILT IN SUPER 60

For fitting into smaller purpose built canopies.

- 3 speed slider controls
- 2 x 40w hob lamps
- Washable metal grease filters
- 100mm (4in) diameter ducting connector
- 52cm wide
- Airflow to 280 m<sup>3</sup>/h
- Black or white

## BUILT IN 52

For fitting into small purpose built canopies.

- 3 speed slider controls
- 2 x 40w hob lamps
- Painted metal air inlet tray with disposable grease filter
- 100mm (4in) diameter ducting connector
- 52cm wide
- Airflow to 280 m<sup>3</sup>/h
- · Black, white or grey

Our 60cm Ultra High Spec. hood is our top of the range integrated model. This hood has the facility to duct horizontally from the back within the height of the appliance using the duct connector supplied.

### INTEGRATED ULTRA

- Twin motors
- 4 speed slider controls
- 14w fluorescent lamp
- · Washable metal grease filters
- 125mm (5in) diameter ducting connector
- 60cm wide
- Airflow to 540 m<sup>3</sup>/h
- Grey

Integrated 60cm cooker hood with single motor and the facility to duct horizontally from the back within the height of the appliance using the duct connector supplied.

INTEGRATED SUPER

- 3 speed slider controls
- 2 x 40w hob lamps
- Washable metal grease filters
- 100mm (4in) diameter ducting connector
- 60cm wide
- Airflow to 300 m<sup>3</sup>/h
- Grey

### INTEGRATED 60 & 90

Integrated hood available in 60cm and 90cm widths. Single motor and disposable grease filters.

- 3 speed slider controls
- 2 x 40w hob lamps
- Disposable fibre filter
- 100mm (4in) diameter ducting connector
- 60cm white, brown or grey
- 90cm grey
- Airflow to 270 m<sup>3</sup>/h

# SLIDE AWAY

Our Slideaway cooker hood fits into the cupboard space above the hob. The slimline front panel can be removed and replaced with a lighting pelmet to match kitchen units.

- 3 speed slider controls
- 2 x 40w hob lamps
- Washable metal grease filters
- 125mm diameter ducting connector
- Grey
- Airflow to 270 m<sup>3</sup>/h

A stylish slim-line freestanding hood to suit every installation.

### CONCORDE

### Concorde

- Single motor
- 3 speed slider control
- 2 x 40w hob lamps
- Disposable grease filter
- Includes charcoal filter type 190
- 100mm (4") ducting connector
- 60cm wide
- Black, white or black with stainless steel front panel
- Can be ducted top or rear
- Adjustable glass visor
- Airflow to 250 m<sup>3</sup>/h

#### **Concorde Twin**

- Twin motor
- 3 speed slider control
- 2 x 40w hob lamps
- Metal washable grease filter
- Includes charcoal filter type 190
- 125mm (5") ducting connector
- 60 or 90cm wide
- Black, white or stainless steel
- Can be ducted top or rear
- Adjustable glass visor
- Airflow to 400 m<sup>3</sup>/h

Traditional styling combined with efficiency.

CHIC

- 3 speed slider controls
- 40w hob lamp
- Disposable grease filter.
- Includes type 50 charcoal filter.
- 100mm (4") ducting connector
- Can be ducted from the top or rear.
- Adjustable tinted visor
- 60cm wide.
- Available black, brown or white
- Airflow to 230 m<sup>3</sup>/h

# Backplates

For a practical solution and professional appeal use our stainless steel back plates. They are reinforced with MDF and are available in 60, 70, 80, 90, 100, 110 or 120cm widths and 650 or 750mm heights. The new fitting flanges with depths of 20mm and 36mm make them suitable for almost all cooker hoods including our Glacier models.

# Utensil Sets

No kitchen is complete without those extra finishing touches. Our 5 piece utensil set, complete with hooks, is designed to coordinate with Elica cooker hoods. Chrome utensil bars, 60, 90 or 120cm wide including hooks are also available, as are additional packs of 5 hooks.

# Chimney Kits

To accommodate different kitchen installations we offer stainless steel chimney extension kits for Igloo, Key and Tamaya. Short kits for Key and Tamaya are also available.

# Plate Rack and Shelf

Our unique plate rack and shelf, provides an ingenious and attractive space saving solution. It has been designed to complement the Spot cooker hoods but can be effectively used as a standalone unit.

# Plinth Heaters

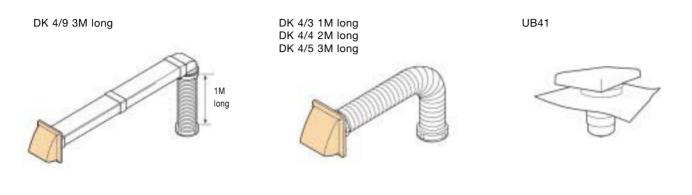

A 2 kW built-in electric fan heater designed for installation in standard kitchen furniture plinths with 1 kW and 2 kW heat settings and neon indicator.

## Rainbow colour match system

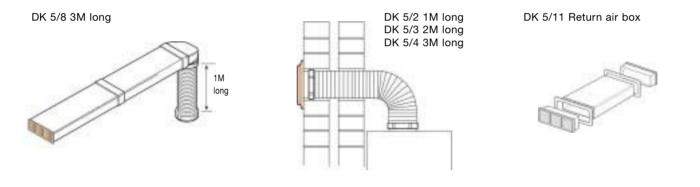

All our hoods can be colour coded to your swatch or matched from our library of paint swatches, RAL or BS paint codes.

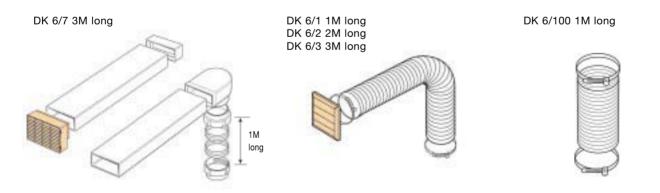

100mm (4") nominal

### 125mm (5") nominal

### 150mm (6") nominal

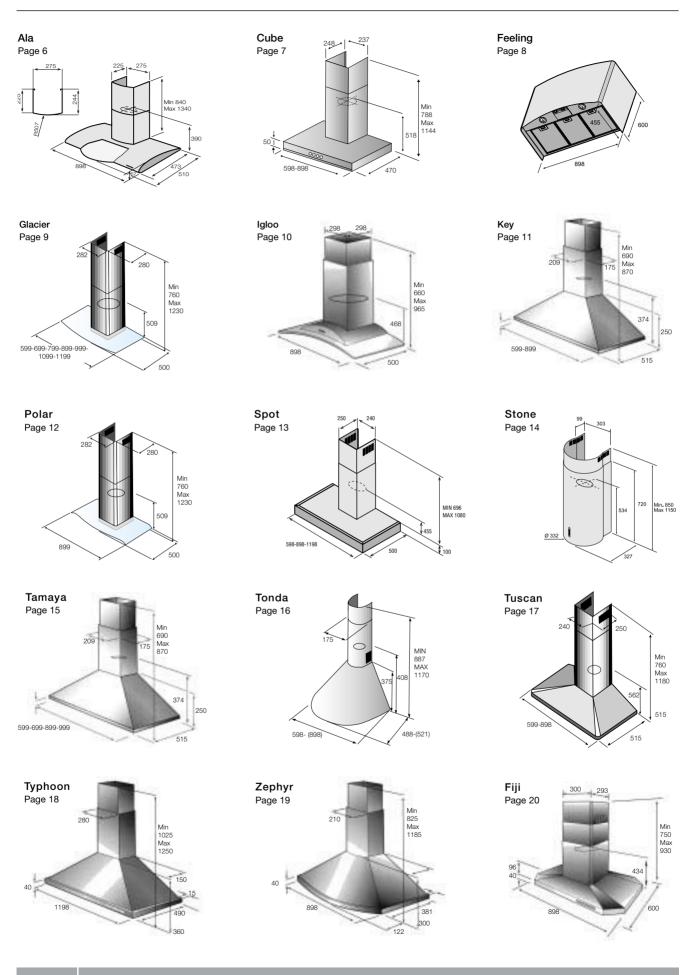

Please ask to see separate Fleeflow Ducting leaflet for a complete range of ducting kits and components.

### IMPORTANT

The ducting chosen must be at least the same area as the connector on the cooker hood. The use of smaller than recommended ducting will adversely affect the designed performance as regards airflow and noise levels.

\*IEC61591 tested with 2.5 meters of ducting. \*\* Minimum height above gas for hobs 11.3kw or less. For higher rated hobs please seek further advice

### Elica Cooker Hood

Elica has total commitment to service, quality and innovation and are proud to supply the world's finest cooker hoods.

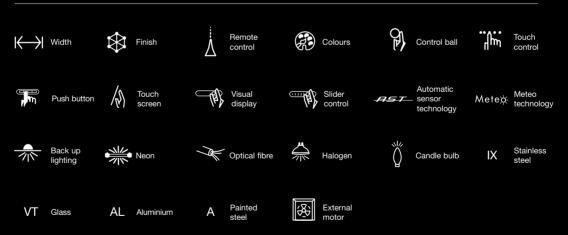

### Your Guarantee

Elica cooker hoods are designed for use in domestic kitchens and are guaranteed for 2 years against faulty material or workmanship, protecting your hood against mechanical or electrical failure.

### Installation

Your cooker hood should be installed by a qualified engineer. If the hood is to be ducted to the outside, it is important that the correct size ducting is used. This will be determined by the ducting connector of the hood and as indicated in this brochure.

To simplify installation Elica have developed their 'Smart' technology and incorporated it in many of our models. Smart utilises the practical system used for attaching kitchen cupboards making it simple to perfectly align the hood with the rest of the kitchen. Smart products can also use the long life filter if ducting the hood is not possible.
