

Domestic Electrician and Contractor TS4U-50

This set of courses are the ultimate electrical training course package and far beyond anything available anywhere in the electrical training industry. We give you all the skills and qualifications you need as a domestic installer and jobbing contractor. Plus our Renewable Energies PV Photovoltaic course enabling you to take advantage of this developing and growing industry.

Course Content

This course package includes 16 separate courses:

5 Day Domestic Installation Workshop: TS4U-MOD1

This 5 Day Practical Installation Electrical Course will enable you to install everything from the consumer unit to the socket and everything in between, for those with little or no electrical experience. Our most popular course!

5 Day Principles of Electro Technology: TS4U-MOD2

This science workshop gives you the foundation knowledge to fully understand how and why an electrical systems works, which is essential when considering progression onto City and Guilds 2391 Inspection and Testing and other contractor short courses.

4 Day City & Guilds 2392-10 Inspection & Testing: TS4U-92

This entry level course is a mix of practical and theory aimed at practicing electrical installers who have not carried out inspection and testing. It is also suitable for those with limited experience of inspection and testing of electrical installations, such as those domestic installers new to the industry, or those working in allied trades. ie, Plumbers, kitchen fitters, landscape gardeners.

5 Day Part P Domestic Installers VRQ Qualification: TS4U-PP

This is the certificate that indicates your competency. When you decide to register as a Domestic Electrical Installer and start to self-certify your installations, this Certificate will be the proof of your competency.

3-day City & Guilds 2382-10 (17th edition) TS4U-82

Every practicing electrician must have their wiring regs certificate (17th Edition). This short course is classroom based, with an online test and qualifies you to obtain your 17th Edition wiring regs.

City & Guilds 2377-12 & 2377-11 PAT Testing Course: TS4U-772

These qualifications enable you to manage PAT testing and undertake PAT testing. Our workshops include both a theory and practical elements; we cover everything necessary to successfully achieve your qualifications and give you skills to undertake PAT testing tasks.

Duration

16 courses in 50 days. If you are unable to commit to 50 days training in one continuous session, you may attend the 16 courses separately. All 16 courses must be booked together to qualify for the discounted rate.

Prerequisite

No previous experience required to attend this course.

Bookings

- Call 01293 554685
- Visit www.tlc-direct.co.uk
- Courses start every week

Payments

You can reserve your place with a deposit of only £950. The balance can be paid over your period of training - making it easier than ever to get the training you need.

“Great centre, great location, surpassed expectation.”

Dean Shelly

Course Content Continued

City and Guilds 2391-10 Inspection and Testing Course: TS4U-91

Advanced level. This electrical course is theory based and is intended for the personnel in electrical contracting companies who have responsibility for the quality of the design, specification, installation and inspection and testing processes. It addresses, in particular the implications of the wiring regulations for electrical installations.

2 Day Emergency Lighting Course: TS4U-EL

A two day course covering the design, installation, commissioning, testing and certification of emergency lighting systems as well as legislative and standards requirements including ongoing operation of the systems.

2 Day Fire Alarms Course: TS4U-FA

The course provides the necessary information to design, construct and commission a non-addressable fire alarm system to BS 5839. The course consists of examining and interpreting the relevant parts of BS 5839 then a practical workshop where a system is designed, constructed and inspected and tested. Candidates are then introduced to the practical issues of system maintenance, certification and reporting.

3 Day Central Heating Controls Course: TS4U-CHC

A three day short course aimed at anyone involved in the construction, commissioning, inspection & testing or maintenance of central heating electrical control systems. The course covers all the commonly used control systems in use today and is focused on the 'practical' construction and commissioning along with the relevant fault finding techniques.

1 Day Burglar Alarm Systems Course: TS4U-BA

This one day course covers the theory and design of domestic burglar alarm systems, allowing you to confidently install the correct equipment and minimise faults and false alarms. Including practical workshop constructing and commissioning & testing a simple domestic burglar alarm system.

2 Day Trunking, conduit and Wiring Systems Course TS4U-TC

This entirely practical course combines the Metal Conduit Course together with PVC Conduit, Plastic Trunking skills training and pre-wired busbar trunking systems, importantly it also includes skills training of the wiring systems and techniques associated with single core wiring methods.

1 Day Data Cabling Course: TS4U-DC

Our data cabling course covers, Termination, crimping, Cat 5 and 6 differences, relevancy, patch panels, backbone setup, RJ45 connectors and sockets, data cabinets, how systems work, Telephone systems, networking systems and relevant Regulations all done in a mix of classroom and workshop.

City and Guilds 2372 Certificate in Installing and Testing Photovoltaic (PV) Systems Level 3 TS4U-ECO

This course is intended for qualified electricians who want to install grid connected domestic photovoltaic systems that are either integrated into, or retro fitted onto, a domestic property. It is expected that candidates will be practicing electricians and have appropriate qualifications related to electrical installation, knowledge of the IEE Wiring Regulations and inspection and testing.

Business Start up Course: TS4U-BIZ

You've taken the initiative and got yourself qualified. Now you're thinking that you'd like to start your own business and start earning for yourself. This course is delivered by real experts in starting and running successful businesses as well as professional trainers from our sister company.

1 Day 2391 Practical Pre assessment day

We use this day to help prepare you for the assessment you are going to undertake. We will look for areas of improvement before you take your assessment giving you the best possible chance of passing.
